

Combined Drought Index (CDI) for the week ending May 20, 2026.

Summary

The national drought situation this week shows a majority of the area in the Normal category, with a small portion experiencing drought conditions. The total area experiencing drought, classified as D0 or worse, was 15.3% this week. This figure reflects a contraction in the drought area compared to the previous week, which was 16.2%, indicating a decrease of 0.9 percentage points week-on-week. The most affected regions by drought were NCT of Delhi, Manipur, Mizoram, Arunachal Pradesh, Jammu & Kashmir, and Meghalaya. Conversely, West Bengal reported 0.0% of its area in drought, while Rajasthan, Gujarat, and Telangana reported 1.0%, 2.1%, and 3.4% of their areas in drought, respectively.

Regional Outlook

North Moderate, scattered drought. About 28% of the area is in drought (D0–D4).

Northwest Largely normal conditions. About 4% of the area is in drought (D0–D4).

Northeast Moderate, scattered drought. About 27% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

East Mostly normal, with localised dryness. About 7% of the area is in drought (D0–D4).

Central Mostly normal, with localised dryness. About 15% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

West Moderate, scattered drought. About 22% of the area is in drought (D0-D4).

South Mostly normal, with localised dryness. About 16% of the area is in drought (D0-D4).
