

Combined Drought Index (CDI) for the week ending April 29, 2026.

Summary

For the week ending April 29, 2026, about 20.5% of India's area was in some level of drought (D0 or worse), with 79.5% at normal conditions. Severe-to-extreme drought (D2 or worse) covered roughly 0.6% of the country. Compared with the previous week, the drought-affected area expanded (+3.3 percentage points). Conditions were driven by the balance of pre-monsoon rainfall, soil moisture and runoff captured in the Combined Drought Index, with the most persistent stress across rain-fed parts of peninsular and central India.

Regional Outlook

North Widespread drought. About 42% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Northwest Largely normal conditions. About 2% of the area is in drought (D0–D4).

Northeast Moderate, scattered drought. About 21% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

East Moderate, scattered drought. About 26% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Central Moderate, scattered drought. About 25% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

West Mostly normal, with localised dryness. About 12% of the area is in drought (D0–D4).

South Moderate, scattered drought. About 20% of the area is in drought (D0–D4).
