

Combined Drought Index (CDI) for the week ending June 3, 2026.

Summary

The national drought situation this week shows a distribution across the drought classes, with 80.4% of the area in the Normal category and 19.6% in the D0+ category. The total area affected by drought, specifically D0+, was 19.6% this week, which represents a contraction of 0.5 percentage points compared to the previous week's 20.1%. Looking further back, the area in D0+ was 15.0% approximately one month ago.

Gujarat exhibited the highest level of drought impact, with 85.2% of its area in drought. Other states with significant drought presence include the NCT of Delhi, which had 69.6% in drought, Arunachal Pradesh at 52.8%, Jammu & Kashmir at 50.4%, Mizoram at 49.8%, and Meghalaya at 43.5%. Conversely, Sikkim reported 0.0% in drought, and Nagaland reported 0.7% in drought.

Regional Outlook

North Moderate, scattered drought. About 30% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Northwest Mostly normal, with localised dryness. About 5% of the area is in drought (D0–D4).

Northeast Moderate, scattered drought. About 37% of the area is in drought (D0–D4). A notable share is in severe-or-worse categories (D2–D4).

East Mostly normal, with localised dryness. About 11% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Central Mostly normal, with localised dryness. About 11% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

West Widespread drought. About 42% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

South Mostly normal, with localised dryness. About 8% of the area is in drought (D0–D4).
