

Combined Drought Index (CDI) for the week ending May 20, 2026.

Summary

About 15.3% of India's area is in some level of drought (D0 or worse), with 84.7% at normal conditions. Severe-to-extreme drought (D2 or worse) covers roughly 0.2% of the country. Compared with the previous week, the drought-affected area contracted. Conditions reflect the balance of pre-monsoon rainfall, soil moisture and runoff captured in the Combined Drought Index, with the most persistent stress across rain-fed parts of peninsular and central India.

Regional Outlook

North Moderate, scattered drought. About 28% of the area is in drought (D0–D4).

Northwest Largely normal conditions. About 4% of the area is in drought (D0–D4).

Northeast Moderate, scattered drought. About 27% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

East Mostly normal, with localised dryness. About 7% of the area is in drought (D0–D4).

Central Mostly normal, with localised dryness. About 15% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

West Moderate, scattered drought. About 22% of the area is in drought (D0–D4).

South Mostly normal, with localised dryness. About 16% of the area is in drought (D0–D4).
