

Combined Drought Index (CDI) for the week ending July 8, 2026.

Summary

The national drought situation this week is characterized by a large proportion of the area remaining in the Normal category, with a significant portion in the D0+ category. The total drought area, measured by the D0+ class, showed a contraction this week, decreasing from 41.2% in the previous week to 30.7%. This represents a decrease of 10.5 percentage points week-on-week. The most severely affected regions by the percentage of area experiencing any drought class were Manipur at 98.1%, Jharkhand at 78.2%, Meghalaya at 77.6%, Assam at 74.5%, Arunachal Pradesh at 70.0%, and the NCT of Delhi at 69.6%. Conversely, Tripura was the least affected state with 4.3% in drought.

Regional Outlook

North Widespread drought. About 48% of the area is in drought (D0–D4). A notable share is in severe-or-worse categories (D2–D4).
