

Combined Drought Index (CDI) for the week ending August 5, 2026.

Summary

The national drought situation this week shows a distribution across the drought classes. The cumulative area for Normal conditions was 65.7%, while the area experiencing D0 or worse conditions was 34.3%. The total area affected by drought, specifically D0+, was 34.3% this week, which represents a contraction of 0.8 percentage points compared to the previous week's 35.1%. Looking further back, the area in D0+ was 30.7% one month ago. The states most affected by drought included Sikkim with 80.8% in drought, Arunachal Pradesh with 78.3%, Andhra Pradesh with 72.4%, Mizoram with 68.0%, Goa with 67.9%, and the NCT of Delhi with 65.2%. Conversely, Nagaland, Gujarat, Tripura, and Rajasthan were the least affected states, with areas in drought of 1.3%, 2.7%, 9.9%, and 10.8% respectively.

Regional Outlook

North Moderate, scattered drought. About 34% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Northwest Mostly normal, with localised dryness. About 11% of the area is in drought (D0–D4).

Northeast Widespread drought. About 58% of the area is in drought (D0–D4). A notable share is in severe-or-worse categories (D2–D4).

East Moderate, scattered drought. About 34% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

Central Moderate, scattered drought. About 34% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

West Widespread drought. About 43% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.

South Moderate, scattered drought. About 40% of the area is in drought (D0–D4). Pockets of severe-or-worse conditions are present.
